Memorandum

Date: May 12, 2021

To: All Residents, Staff, Volunteers, Essential Caregivers, and health system partners

From: Wayne D. Williams, Chief Executive Officer

Re: 2021 Census of Population

We have received inquiries from residents who were concerned that they had not received a Census package.

We have received confirmation that our "Collective Dwellings" submission was received in advance of the Tuesday, May 11th, 2021 deadline.

Details re: 2021 Census of Population – Collective Dwellings

"Statistics Canada is conducting the 2021 Census of Population for collective dwellings. The census provides a statistical portrait of Canada every five years. It plays a vital role in giving decision makers high-quality data and is important for communities. It is used to plan services that support employment, schools, public transportation, hospitals and residences for seniors, among others.

To ensure that we count every Canadian, we are relying on collective dwelling administrators to provide us with basic sociodemographic information about usual residents, such as name, date of birth, sex at birth and marital status."

Please rest assured that all is well. We apologize if this caused any angst or inconvenienced anyone in anyway. In an effort to reach as many people as possible, this information will also be sent via Group Casting, posted on our website and posted on our bulletin boards.

Sincerely,

Wayne D. Williams
Chief Executive Officer
